

CANADIAN BOWLS

LOG BOWLS COMBINE the incomparable beauty of trees in their natural state with a high-gloss vibrant finish. Each bowl is handmade using only locally reclaimed trees of all varieties (fallen or cut down due to infrastructure, re-landscaping, droughts, or stormy weather). The trees are hand selected, gathered, turned and finished by Canadian artisans.

The bowls come in a large variety of colors and are completed by hand with a water-based, furniture grade finish.

Approximately 2" - 10" in diameter.
